Craftsmanship Skills

Java	Kotlin
Spring boot	Maven
Typescript	Angular
React	Yarn
Azure	Jenkins
IntelliJ	Git
GitHub	

Open Source

- "Giving back to the community that helps us has been a driving force personally for me.
- <https://github.com/ff4j/ff4j-spring-boot-starter-parent>
- Author of ff4j-spring-boot-starter, a library for feature toggles and flippers.
- <https://github.com/devs-from-matrix>
- Author of for scaffolding hexagonal architecture code.
- <https://github.com/societe-generale/ci-droid>
- Contributor of ci-droid, dev team best buddy, taking care of all the housekeeping for your epositories and giving tips to developers

Experience

Present	Principal Architect GBTO - Societe Generale - Global Solutions Center., Bangalore, IN ● Leading enterprise architecture initiatives for GBTO, driving modernisation and scalability across platforms ● Defining architecture strategy, governance, and technical roadmaps to align with global business objectives ● Enabling high-availability and resilience through cloud-native patterns and self-healing system designs ● Designed BI architecture and transition roadmap ● Enabling the strategic replacement of Informatica with modern data integration technologies. ● Introduced micro-frontend strategy with Angular, enhancing modularity, agility, and reusability ● Implemented self-healing capabilities in monitoring systems, reducing downtime and lower any manual intervention
2020 - 2016	Feature Engineering Lead & Practice Manager Pilotage - Societe Generale - Global Solutions Center., Bangalore, IN ● Increased agility by 40% by transitioning to a microservice architecture, enabling faster releases and enhanced scalability ● Automated developer quality and test coverage feedback loops, improving release confidence ● Transitioned teams to the Spotify feature team model, increasing agility and cross-functional collaboration
2016 - 2012	Technical Lead CPM - Societe Generale - Global Solutions Center., Bangalore, IN ● Was involved extensively in developing and leading application development using Swing and Spring. ● Built framework for the organization for developing swing application ● Laid the path way to transform from swing (thick client) to angular (thin client)
2012 - 2008	Associate Consultant and Lead Consultant ITC Infotech, Bangalore ● Contributed to the application development of load and balance of aircraft ● Contributed and lead the development of a hospitality application catering the needs to Starwood hotels ● Onsite co-ordinator and cross platform lead for development team at Denver, Colorado

Education

Bachelor of engineering graduate from Vivekananda Institute of Technology specializing in information Science.

Personal Promotions

- Innovative mind for the year 2015 at Societe Generale
- Star of the Quarter for the Year 2014, 2015, 2016, 2018 & 2024 at Societe Generale
- Achiever of the year (Most Valuable Associate IT Consultant) 2010, at ITC Infotech
